

How to Make a Giant Gingerbread Man

Purchase galvanized Zbar roof edge at Home Depot that is 5/8" by 10' for about \$3.98. This will be in the aluminum siding department. Cut off the folded over edge with wire cutters. Shape the piece with the serrated edge around the gingerbread man pattern. Secure the open edge with two pop rivets, or punch two holes and wire the edge shut.

Gingerbread Men Cookies - an Old Swedish Recipe

2/3 cup butter
3/4 cup white sugar
1 beaten egg
1/4 cup dark or light molasses
3 cups flour
1/2 tsp. salt
1 tsp. baking soda
1 tsp. cinnamon
1 tsp. ginger
1/2 tsp. cloves

Pat out on wax paper to 1" thick. Wrap in wax paper, and then a sealable plastic bag to keep dough from drying out. Refrigerate for an hour, up to two days. Use 1/4 of the dough at a time. Roll out on floured surface to 3/8" to 1/4". Cut gingerbread men and bake 350 degrees, 9-10 minutes on an ungreased cookie sheet.

This recipe yields approximately 4 large gingerbread men or two dozen standard size gingerbread men.
